As Technology advances and the world gets larger and we begin a new chapter in space travel and electric vehicles and working to preserve our planet in all ways, what do you envision the future of floral design looking like? On our 70th anniversary as an association, we have seen over 7 decades of floral designs change, advance and evolve based on trends, world conditions and influences and personal design taste. If you were a trendsetter of the future, what would you do?

Give us your interpretation of what floral design may look like in the future. Think outside the norm, outside of the box, and even outside the planet. What would YOU imagine floral designs look like 70 years from now?
